HW4 Report

CSE222

ELIFNUR KABALCI - 1801042617

Test method:

```
public static void test() {
       fs.createDirectory("home", currentDirectory);
       fs.createDirectory("desktop", currentDirectory);
       fs.createFile("project.txt", currentDirectory);
       System.out.println();
       System.out.println("After adding 2 directory, 1 file");
       fs.listContent(currentDirectory);
       fs.deleteFile("project.txt", currentDirectory);
       System.out.println();
       System.out.println("After delete file");
       fs.listContent(currentDirectory);
       fs.deleteDirectory("desktop", currentDirectory);
       System.out.println();
       System.out.println("After delete directory");
       fs.listContent(currentDirectory);
        System.out.println();
       fs.sortDirectoryByDate(currentDirectory);
       System.out.println();
       fs.createDirectory("path1", currentDirectory);
        fs.createDirectory("path2", currentDirectory);
       fs.createFile("file1.txt", currentDirectory);
        System.out.println();
        fs.printDirectoryTree(fs.getRoot(), " ");
       System.out.println("*****************");
        currentDirectory = fs.changeDirectory("root/home");
       System.out.println("Current directory: " + currentDirectory.getName());
       System.out.println();
```

```
System.out.println("Search and found: " + fs.search("path1",
fs.getRoot()).getName());

System.out.println();
Directory d = (Directory) fs.search("home", (Directory) fs.getRoot());
fs.moveelement("file1.txt", d);
System.out.println();

System.out.println("After moving file1.txt root to home");
fs.printDirectoryTree(fs.getRoot(), " ");
}
```

Test method output:

```
After adding 2 directory, 1 file
*Directory: root
* Directory: home
* Directory: desktop
* File: project.txt
After delete file
*Directory: root
* Directory: home
* Directory: desktop
After delete directory
*Directory: root
* Directory: home
Name: homeDate: 2024-04-21 23:52:51.614
   * home
   * path1
   * path2
    - file1.txt
********
Current directory: home
Search and found: path1
After moving file1.txt root to home
    * home
       - file1.txt
    * path1
    * path2
PS C:\Users\e.kabalci2018\Desktop\hw4>
```

Output:

```
Current directory: /root
==== File System Management Menu =====

    Change directory

2. List directory contents
3. Create file
4. Create directory
5. Delete file
6. Delete Directory
7. Move file/directory
Search file/directory
9. Print directory tree
10. Sort contents by date created
11. Exit
Please select an option:
Enter directory name to create: home
